Putting the Pieces Together

Comprehensive Memory Care Training

Are you looking for a fresh approach to memory care training? An easy to use, interactive training program that will engage your team to enhance the quality of care for your residents living with dementia?

*The **LEAP** Memory Care Program is a groundbreaking platform that provides all the tools necessary to develop a state-of-the-art dementia care program, enables you to provide compassionate care and set your memory care community apart from competitors.*

The **LEAP** Memory Care Program is a complete training system to prepare you and your team to offer an innovative and quality experience for your residents affected by memory changes. **LEAP** offers an all-in-one packaged program with trainings and tools in an easy, educational format to enable team members to acquire new techniques, skills and confidence to offer meaningful care to your memory care residents.

The Core Value of the LEAP Memory Care Program is: “HONOR THE WHOLE PERSON”.

LEAP goes beyond the traditional care model’s focus on tasks and scheduled activities to recognize that each resident is an individual with personal preferences and abilities. **LEAP** memory care communities support each resident to maintain their talents and continue to live a meaningful life.

LEAP training emphasizes four important elements:

- **Leadership** – Leadership sets the culture for great care. Many dementia training programs are written only for the direct-care staff, ignoring the importance of partnership and collaboration between all team members, including department leaders with their entire team. **LEAP** offers 2 1-hour trainings developed specifically for leadership team members. With an overview of the **LEAP** program, leaders will have an increased understanding of what the resident with dementia is experiencing and how to support their teams to be successful. Inefficiencies and care missteps can be avoided with focused training for all departments.
- **Engagement** – **LEAP** provides tools to engage the residents, encouraging each resident to have purpose and be successful. All team members are part of the Engagement team, collaborating to support each resident’s individual interests.
- **Approach** –Staff understands that resident actions are forms of communication to be listened to and understood. Individual preferences and daily rhythms are honored.

Putting the Pieces Together

- **Positive impact** - As we focus on the retained talents and interests of each resident, instead of seeing only their cognitive losses and disabilities, we perceive them from a more positive perspective. **LEAP** communities offer opportunities for memory care residents to use their abilities and experience a more normal and meaningful life.

The **LEAP** program includes:

- **Modules specifically written for Executive Directors and other leadership positions.**

Leadership modules include:

- ❖ Role of leadership in setting the culture for better care
- ❖ Overview of LEAP Program and philosophy of care.
- ❖ Common care challenges for Memory Care in Assisted Living

- **Modules designed for Direct Care Staff**

Each module for direct-care staff has a specific topic. For flexibility of training, each module can be offered in one 60-minute training or in 3 20-minute segments. Every training module is complete with its own sign-in sheets, handouts, quizzes, and Keys for Caring (tips for success).

Each module is taught in an interactive way, prompting the staff member to think about care challenges and how to meet the needs of the resident with an individualized approach.

LEAP provides:

- Specialized learning materials to prepare leaders to effectively deliver **LEAP** trainings and support direct care staff.
- Direct-care staff training modules that can be delivered by any team member with easy-to-follow Facilitator guides and interactive questions/activities to engage the learners.
- Each module includes sign-in sheets, relevant handouts, questions to make the training interactive, quizzes and Keys for Caring (tips for success).
- Because finding time for trainings can be difficult, **LEAP** modules are designed to be delivered in brief 20-minute learning opportunities (such as at change of shift or monthly team meetings) or they can be grouped into 1-hour length trainings
- Complete package of training modules is delivered to your Community by the 1st of every month. Each monthly package contains materials for a one-hour training and all the tools necessary to make it an engaging and rewarding learning activity.
- A calendar of training subjects published 6 months in advance

Putting the Pieces Together

- **LEAP** has a library of developed modules. If your community has a special training need, additional materials can be available.
- Access to webinars on **LEAP** topics at no additional cost with year's subscription of training modules.

Set Your Memory Care Community Apart

The demand for senior living to provide quality memory care is growing due to demographics and increased expectations by prospective customers. Families searching for a care environment for their loved one look for more than a safe and clean environment. They look for leadership, trained staff and an environment that will provide quality of life and support their loved one with dignity throughout their entire journey with dementia.

The **LEAP** Memory Care program is authored by Anne Ellett, N.P., M.S.N. an established thought-leader in dementia care. As a nurse practitioner who specializes in dementia care, Anne understands that without providing adequate training and education, creating quality memory care is not possible. www.memorycaresupport.com
